Professional Summary

Full-Stack Software Engineer specializing in React, Java, Python, and Serverless architectures. Proven track record in designing scalable financial transaction flows, payment integrations, and AI-driven applications. Deeply experienced in the full Software Development Life Cycle (SDLC), Agile/Scrum methodologies, and CI/CD practices. Passionate about leveraging AI and automation to build secure, robust enterprise solutions within the financial services sector.

Education

BSc. Information Communication Technology | *Ghana Institute of Management and Public Administration (GIMPA) – Accra, Ghana* | Expected Oct 2027

Certification in Software Development (CSD) | *The Ghana-India Kofi Annan Centre of Excellence (AITI-KACE) – Accra, Ghana* | Oct 2023 – Dec 2023

General Science (WASSCE) | *Achimota High School – Accra, Ghana* | Sep 2023

Technical Projects

Lead Full-Stack Developer | *E-Commerce & Logistics Platform* | Active | Nov 2025

- Architected a highly scalable, serverless e-commerce platform using React and Supabase, replacing legacy operations with an automated digital ecosystem.
- Engineered a secure split-payment checkout flow integrating Paystack and local Mobile Money APIs, demonstrating capability in robust financial processing.
- Gathered internal client requirements to design a real-time logistics dashboard, translating business needs into technical specifications using OSRM for live ETA calculations.
- Managed continuous integration and deployment (CI/CD) events, orchestrating sprint planning, pull requests, issue triage, and rapid feature deployment under strict Scrum methodologies.

Software Developer | *Global Entrepreneurship Festival 2025 (Hackathon)* | Nov 2025

- Demonstrated capacity for innovative thinking and problem-solving by developing an AI-powered cybersecurity system prototype under tight deadlines.
- Awarded a Certificate of Achievement for an exemplary display of teamwork, leadership, collaboration, and technical execution in a fast-paced environment.

Hardware/Software Integrator | *Bluetooth-Controlled IoT Lamp* | Completed | Feb 2025

- Developed a smart IoT lamp utilizing Arduino, HC-05 Bluetooth modules, and a custom user interface.
- Engineered a seamless phone-to-relay communication system, achieving under 1-second

response times for instant functionality and demonstrating robust interface integration.

Professional Experience

Lead Software Engineer (Executive) | Digital Point – Accra, Ghana | Nov 2025 – Present

- **Technical Design & Architecture:** Spearheaded the technical architecture and end-to-end development of "Aeopy," a proprietary, centralized Direct-to-Consumer (D2C) retail infrastructure, operating as the company's core product offering.
- **System Optimization & Delivery:** Engineered a highly optimized, zero-maintenance system from the ground up, successfully deploying and launching the digital infrastructure for three distinct client businesses to date, aligning with strategic growth goals.
- **Process Reengineering & CI/CD:** Act as the primary technical executive, gathering business requirements and translating them into technical specifications to ensure system security, scalability, and seamless integration for all current and future client modules.

Robotics Intern | The MakersPlace – Accra, Ghana | Jun 2025 – Jul 2025

- **System Design & Hardware Integration:** Engineered and programmed an interactive mBot showcased at the World Youth Skills Day STEM exhibition, utilizing servo motors to automate an object-relocating gripper mechanism.
- **Client Communication & Stakeholder Engagement:** Delivered live technical demonstrations, effectively communicating complex hardware-software integration concepts and robotic systems logic to non-technical stakeholders and public audiences.
- **Troubleshooting & Problem Solving:** Programmed, tested, and troubleshooted complex robotic systems, demonstrating robust logical problem-solving and a strong focus on seamless system integration.

Data Entry Intern | Sunsoft Systems – Accra, Ghana | Sep 2020 – Feb 2021

- **Data Accuracy & Workflow Optimization:** Accurately managed high-volume customer and business data entry, ensuring 100% precision for digital record-keeping and contributing to overall workflow efficiency.
- **Information Systems Management:** Scanned, organized, and archived critical business documents, significantly improving relational database retrieval times and digital accessibility for internal teams.

Technical Skills

- **Languages:** Java, Python, TypeScript, JavaScript, SQL, HTML/CSS
- **Frameworks:** React, Tailwind CSS, Node.js
- **Databases:** Relational Database Design, PostgreSQL, Supabase, Serverless Architecture
- **DevOps & Tools:** Git/GitHub (Branching, Pull Requests), CI/CD workflows, Agile/Scrum
- **Integrations:** Cloudinary AI API, Paystack (Payments), OSRM & Web Services
